What is Quext Smart Home Solution?

Elevate your property to the next level with cutting-edge IoT smart devices connected by our **patented smart thermostat hub**. Seamlessly automate building devices for peak efficiency and security, while delivering an unparalleled, futuristic smart home experience to residents.

Quext Hub solution currently includes:	**Cutting Edge Technology:**
✔ Smart Thermostat (patented technology - hub)	✔ LoRaWAN Network
✔ Smart Accessories: Locks, Leak sensors, Lights	✔ Cloud-base interface (Amazon Web Services)
✔ Access Control	✔ Property Management Integrations

What is Quext Smart Home Solution?

Quext Hubless solution currently includes:

- ✔ Unit Locks
- ✔ Lock Syncing
- ✔ Access Control
- ✔ Unlock Notifications
- ✔ Cameras
- ✔ Web Portal

Quext Thermostat.

Patented LoRaWAN Technology

Instead of WiFi, Quext IoT thermostats run on LoRaWAN network technology. That means you get reliable, affordable connectivity without a costly hub that does nothing.

Embedded Smarthub

Our cost-effective thermostats come with built-in LoRaWAN smarthubs. This lets them communicate with other smart devices that connect via Z-wave or Bluetooth without any extra equipment.

✔ Mobile Climate Control	✔ Auto Mode	✔ Embedded Smarthub
✔ Vacant Mode	✔ Climate Schedules	✔ Remote Lock Control
✔ Motion Sensing	✔ Patented Tech	✔ Automated Lock Updates

Schlage BE Lock.

Secure, Smart, and Seamless

Schlage BE smart locks integrate effortlessly with Quext's IoT ecosystem, providing residents and property managers with a seamless access control experience.

Entry Records on Demand

Thanks to Quext's patented LoRaWAN technology and portal software, Schlage BE locks record when the lock has been engaged - giving transparency to staff and residents, if needed.

✔ Keyless Entry	✔ Custom Access Codes
✔ Remote Access Control	✔ Audit Trails + Logs
✔ Auto Lock Updates	✔ Visitor Access

Access Control

Schlage RC Reader

- ✔ Keyless Entry
- ✔ Live Updates
- ✔ Constant Connection
- ✔ High-Traffic Areas
